ONE STEP AHEAD!**

## **Company's Foundation**

### **A newly established firm,**

with a staff of highly specialized experts. Sinewave Energy is a company founded recently in Lebanon, it's one of the most advanced service companies for generators offering preventive and corrective maintenance. These different approaches to maintenance have their own benefits and drawbacks to choose the correct maintenance activity required for each project. In addition, the analysis of the generator sales market including size, share, growth and forecast. Sinewave has the highest growth dynamics of innovation to guarantee continues power supply in the toughest challenges.

Sinewave's founders have invested their vast experience in the power industry globally, tracking the solar power system to provide electricity for large power plant. As it is known today, our society are facing major challenges; financial, economic and energy crisis. Our company provide high performance solar system with competitive cost as an alternative solution to downsize such crisis. This renewable energy solution includes a wide range of solar lighting kit.

Our company rely on providing the "best in class" performance to create superior energy solutions. Fortunately, Sinewave offer the "top of line" generator sets for your power and project needs. Sinewave customize overall power solutions according to customer's demand. Our group always adhere to the principal of "Quality First".
